## OBJECTIVE

---

- Motivated and detail-oriented Java Developer specializing in the Spring Framework with a strong foundation in Java, Spring Boot, REST APIs, Hibernate, and database management. Seeking an entry-level position where I can apply my skills in developing scalable, secure, and efficient applications while contributing to organizational success.

## EDUCATION

---

- **Graphic Era Hill University** 2019 – 2023  
*B.Tech - CSE* 8.04 CGPA

## EXPERIENCE

---

- **Associate Java Developer** September 2024 – Present  
*Krenai Remote*
  - Worked as a Spring Application developer using Spring Framework for microservices, integrating Paypal payment gateway APIs for ecommerce client, testing and developing APIs.
- **Consultant High School Teaching** November 2023 – March 2024  
*Python and Web Development Dehradun, Uttarakhand*
  - Provided high school teaching consultancy in Python and Web Development.
- **Embedded Developer (Internship)** August 2022 – November 2023  
*Marrvino Dehradun, Uttarakhand*
  - Worked as an Embedded Developer in a university startup under professor Gaurav Kumar, contributing to the design & development of IoT-based technologies and products, including hardware-software integration, microcontroller programming, & prototype development.

## PROJECTS

---

- **Project Management System (Spring Boot)**
  - Developed a secure project management system with role-based access control, secure authentication, project management, team assignments, and document management.
  - Tech stack: Spring Boot, Spring Security, React, PostgreSQL, JWT, BCrypt.
- **E-commerce Backend API Architecture (Spring Boot Java)**
  - Developed and deployed a secure REST API for e-commerce with product, cart, and order management.
  - Implemented JWT authentication and integrated Stripe payments.
- **IoT Based Vital Parameters System**
  - Developed a wearable device to measure body vitals using ESP-32 and biomedical sensors.
  - Tools: Arduino IDE, MySQL, PHP, HTML/CSS, LVGL library.
- **Home Automation using Google Assistant & Alexa**
  - Built a smart switchboard controlled via Google Assistant and Alexa using ESP-32.
  - Utilized Sinric Pro API, EasyEDA for circuit design, and LVGL library for embedded UI.

## TECHNICAL SKILLS

---

**Languages:** Java, JSON, Python, C++, C, HTML, CSS

**Frameworks:** Spring Framework (Spring Boot), React, MVC

**Databases:** RDBMS SQL, PostgreSQL

**Tools:** Git/GitHub, Swagger/OpenAPI, Postman, Arduino IDE, Xampp control panel, Visual Studio

**Technologies:** RESTful/REST API, JWT, Spring Security, Hibernate, JPA, Junit, mockito, IoT, Microservices, Payment Gateway APIs (Paypal, Stripe)

**Microcontrollers:** Arduino, STM32, ESP32

**Concepts:** Mathematical modeling, Hardware-Software Integration, Microcontroller Programming, Prototype Development, Role-Based Access Control (RBAC), BCrypt password hashing

## ACHIEVEMENTS

---

- 1st position in IIT Kharagpur robotics event (Robo War).
- 1st position in Ornithon at college level.
- 2nd runner up in international robotics event (Robo Race, Technoxian).
